

STEP-BY-STEP INSTALLATION GUIDE

PROVIDED TOOLS:

- 6 DRYWALL ANCHORS (IF APPLICABLE)
- 6 DOUBLE-ENDED SCREWS

NECESSARY TOOLS (NOT PROVIDED):

- PENCIL
- TAPE MEASURE
- DRILL
- 7MM DRILL BIT
- RUBBER Mallet (OPTIONAL)
- PLIER (OPTIONAL, FOR ASSISTANCE IN TIGHTENING SCREWS)
- LEVEL

STEP
1

1. CHOOSE LOCATION:

Tools: Pencil, Tape Measure.

Usage: Use the pencil to mark the spots lightly on the wall where you want to install the hooks. Use the tape measure to ensure proper spacing and alignment if installing multiple hooks.

STEP
2

2. DRILL HOLES:

Tools: Drill, 7mm Drill Bit

Usage: Use the drill with the 7mm drill bit to drill holes into the wall at the marked spots, approximately 30mm deep. Ensure the holes are drilled perpendicular to the wall surface.

STEP
3

3. INSTALL ANCHORS (IF NECESSARY):

Tools: Drywall Anchors, Rubber Mallet (optional)

Usage: If your wall is drywall or sheetrock, insert the provided anchors into the drilled holes. Use a rubber mallet if necessary to ensure they're securely in place. Skip this step if you're mounting on a wood wall.

STEP
4

4. MOUNT HOOKS:

Tools: Wooden Wall Hooks, Double-Ended Screws, Plier (optional, for assistance in tightening the screws).

Usage: Insert one end of the provided screw into the predrilled hole on the hook by hand. You may use a plier if necessary to ensure a secure fit.

STEP
5

5. SECURE HOOKS TO WALL:

Tools: None

Usage: Tighten the other end of the screw into the wall anchor or directly into the wall if mounting on wood. Ensure the hook is tight against the wall.

STEP
6

6. CHECK ALIGNMENT:

Tools: Level

Usage: Use a level to ensure the hooks are straight and aligned properly if installing multiple hooks. Adjust as necessary.

STEP
7

7. ENJOY YOUR HOOKS:

Your Smora wooden wall hooks are now installed and ready to use! For further assistance, don't hesitate to contact us: info@gosmora.com.

HAVE QUESTIONS OR NEED HELP?

Your satisfaction is our priority!
